SUMMARY

A graduate with a degree in Software Engineering and Information Systems, I am a passionate computer science enthusiast driven by a keen interest in solving complex problems and crafting innovative solutions. With a strong theoretical and practical foundation. My enthusiasm for innovation motivates me to create ingenious and efficient solutions.

PROFESSIONAL EXPERIENCE

Final Year Internship at Finlogik Offshore Solutions Sfax　　　　**Feb 2024 -Jun 2024**
- Developed a plugin to automate test scenario creation using Gherkin language, enhancing testing efficiency.
- Collaborated with team members to integrate and refine the plugin within existing software infrastructure.
- Documented plugin functionalities and created user guides to facilitate its adoption and usage by testing teams.

Internship at CoConsult Sfax　　　　**Jun 2023 - Jul 2023**
- Designed and developed a web-based inventory management application to streamline stock tracking and management processes.
- Implemented key features including real-time inventory updates, stock level alerts, and user authentication.
- Conducted testing and debugging to ensure application reliability, and documented the system for user training and support.

EDUCATION

Degree in Software Engineering and Information Systems　　　　**Sep 2021 - Jun 2024**
International institute of technology

Bachelor of Economics and Management　　　　**Sep 2017 - May 2021**
Mahmoud Megdich High School
